### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with attorney Thomas B. Haverstock on 2-13-2004.

The application has been amended as follows:

In the abstract, lines 3, 5, 7, and 9, the word "comprises" has been replaced with -- includes --.

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: The prior art of record not relied upon is considered relevant to applicant's disclosure. DeSimone et al (US 2003/0051741A1) and Matsushita, et al (US 2002/0170671A1) teach a multichamber apparatus which includes a supercritical vessel. DeSimone et al is not prior art, as its filing date is later than applicant's filing date, and similarly Matsushita et al is not prior art for the same reason. Wallace et al (US 6,024,801) does not teach or suggest among other limitations of applicant's claims, the step "without exposure . . . to a surrounding environment", but rather passivates the substrate in the supercritical chamber before removal from the supercritical chamber. Tseronis, et al. (US 6,508,259B1) discloses a supercritical chamber with a movable platform which can be operated in conjunction with a robot (col. 3, lines 52-60; col.5, lines 7-10), and the

platform may be surrounded by a bellows to prevent debris contamination. However, there is no teaching or suggestion of , among other limitations, "through a valve...without exposure...to a surrounding environment", because Tseronis, et al teaches that the bellows protects from debris, and not that it prevents the surrounding environment from contacting the substrate. The IDSs dated 1-18-2002, 11-14-2003, 11-18-2003, and 11-18-2003 have been reviewed. The prior art contained in the IDSs does not teach or suggest all of the limitations of the allowed claims, as for example the limitation "depositing the film on the desorbed substrate from the second module...transferred from the first module through a valve without exposure...to a surrounding environment."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Caridad M. Everhart whose telephone number is 571-272-1892. The examiner can normally be reached on Monday through Fridays 7:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Matthew S. Smith can be reached on 571-272-1907. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
